

Build Your Burrito

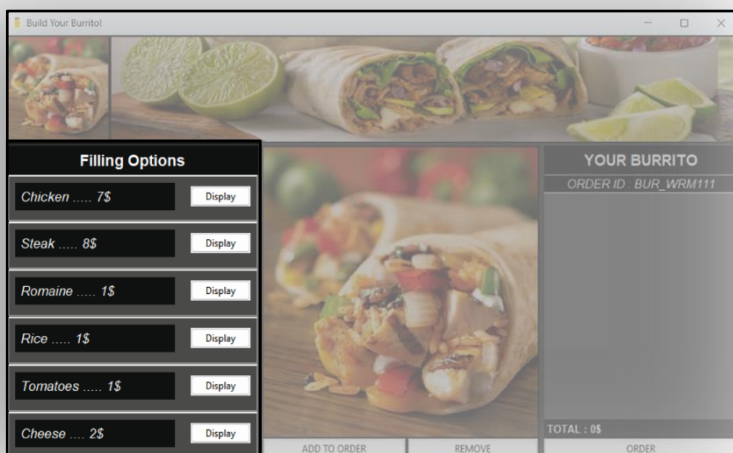

Ordering Application User's Manual

Created February 27th, 2023.

Introduction

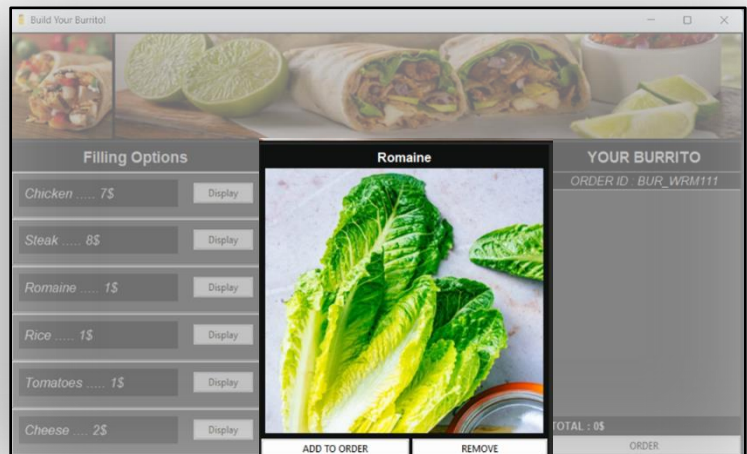

This application lets you build your own burrito to order! There is a list of fillings to choose from and burritos are ready fifteen minutes from when you place your order.

Build Your Burrito

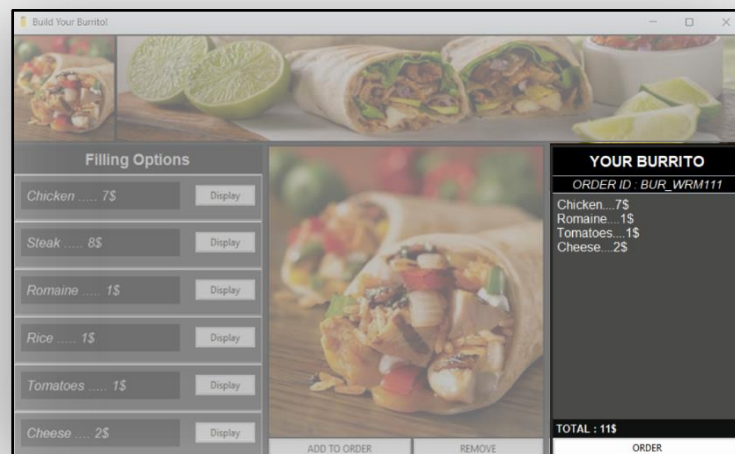

On the left-hand side of the application there is a list of fillings for you to choose from. Clicking on the display button will display a picture of that topping in the center of your application.

If you would like to add that filling into your burrito you simply press the 'ADD TO ORDER' button. If you would like to remove an ingredient from your burrito, ensure that ingredient is what is selected and showing in the center picture, then press the 'REMOVE' button.

Confirm Burrito Build and Place Your Order

The right side of the screen will populate your order as you build your burrito. When you are happy with your burrito build, press the 'ORDER' button on the bottom right of the application.

Order Confirmation

Pressing the order button places your order, sending your burrito order to be made! A confirmation screen will appear letting you know that your burrito order will be ready in 15 minutes!
